INJECTIONS

DECA 300

Nandrolone Decanoate

DESCRIPTION

It is a very powerful anabolic steroid with plenty of benefits to the use. It is used by athletes during the off season when they are interested in bulking up and getting stronger.

STRENGTH
300 mg/ml

DOSAGE
300 - 600 mg/week

PACKAGING
10ml Vial

BULK 600

Bulking Blend Injection

DESCRIPTION

Promotes lean muscle mass and increases strength gains which is a great benefit for those wanting to have an bulky physique.

STRENGTH
600 mg/ml

DOSAGE
600mg - 1200mg/week

PACKAGING
10ml Vial

CUT 200

Cutting Blend Injection

DESCRIPTION

This mixture has an optimal ratio of Trenbolone, Drostanolone and Testosterone active agents in order to reach all of your aims.

STRENGTH

200 mg/ml

DOSAGE

400mg - 600mg/week

PACKAGING

10ml Vial

EQ 300

Boldenone Injection

DESCRIPTION

Boldenone greatly stimulates hematopoiesis. Elevated levels of red blood cells improve oxygen delivery to the muscles. This makes this steroid attractive for track and field athletes.

STRENGTH

300 mg/ml

DOSAGE

300mg - 600mg/week.

PACKAGING

10ml Vial

MASTERON P 100

Drostanolone Propionate

DESCRIPTION

It should be used at the end of a cycle to help with prepping for a contest. Adding Drostanolone Propionate can help a bodybuilder to cut the last amounts of fat that seem to linger and be hard to get rid of with diet and workouts alone.

STRENGTH
100 mg/ml

DOSAGE
100 mg EOD.

PACKAGING
10ml Vial

PRIMA 100

Methenolone Enanthate

DESCRIPTION

Methenolone is an anabolic steroid, modification of dihydrotestosterone (DHT) with weak androgenic activity and a moderate anabolic effect. The Methenolone hormone has also been shown to have a positive effect on the immune system.

STRENGTH
100 mg/ml

DOSAGE
200mg - 600mg/week.

PACKAGING
10ml Vial

SUSTANON 400

Sustanon Injection

DESCRIPTION

Sustanon 400 Injection is similar to the natural male hormone, testosterone. It works by replenishing the deficient testosterone levels in adult men. Lack of testosterone may cause various health problems including impotence, infertility, low sex drive, tiredness, depressive mood and bone loss.

STRENGTH

400 mg/ml

DOSAGE

400mg - 800mg/week.

PACKAGING

10ml Vial

TEST C 250

Testosterone Cypionate

DESCRIPTION

It is a synthetic version of testosterone, but it is going to offer the body the same benefits as natural produced testosterone. There are a variety of responsibilities this hormone offers for the male body on a mental and physical level.

STRENGTH

250 mg/ml

DOSAGE

500mg -750mg/week.

PACKAGING

10ml Vial

TEST E 250

Testosterone Enanthate

DESCRIPTION

It is an anabolic steroid that can be used for beginners, intermediate, and advanced athletes. It is a good choice for someone who has never used any type of anabolic steroid before but they want to get started.

STRENGTH

250 mg/ml

DOSAGE

500mg -750mg/week.

PACKAGING

10ml Vial

TEST P 100

Testosterone Propionate

DESCRIPTION

Testosterone Propionate is a pure form of the testosterone hormone. The process used to synthesize the compound allows the body to react to it the very same way it would with natural testosterone in the body.

STRENGTH

100 mg/ml

DOSAGE

300mg - 600mg/week.

PACKAGING

10ml Vial

TREN E 200

Trenbolone Enanthate

DESCRIPTION

A very powerful anabolic steroid to consider using is Trenbolone Enanthate. This product is also injected less often than others in the same category. It is used by athletes in a cutting cycle because it helps with retaining lean muscle mass.

STRENGTH

200 mg/ml

DOSAGE

400mg - 600mg/week.

PACKAGING

10ml Vial

TREN A 100

Trenbolone Acetate

DESCRIPTION

Even if you were to stack several anabolic steroids and use them in conjunction with each other, they would fall short of what Trenbolone Acetate offers on its own! It is that powerful!

STRENGTH
100 mg/ml

DOSAGE
300mg - 400mg/week.

PACKAGING
10ml Vial

WINSTROL-100

Stanozolol Injection

DESCRIPTION

Stanozolol can help to prevent the lean tissue from being destroyed during a cutting cycle. However, it may also have its place in a bulking cycle when stacked with other anabolic steroids.

STRENGTH
100 mg/ml

DOSAGE
100 mg EOD.

PACKAGING
10ml Vial

NAND P 100

Nandrolone PhenylPropioate

DESCRIPTION

NPP is valued for its anabolic properties, promoting muscle growth, increased strength, and aiding in recovery. Athletes and bodybuilders often incorporate it into their training regimens to enhance performance and achieve lean muscle gains.

STRENGTH

100 mg/ml

DOSAGE

200mg - 600mg/week

PACKAGING

10ml Vial

TEST S

Testosterone Suspension

DESCRIPTION

Testosterone suspension is a potent and fast-acting injectable testosterone compound. Due to its lack of ester, testosterone suspension acts quickly in the body, providing rapid effects on muscle growth, strength, and overall performance. Athletes and bodybuilders often use it for its ability to enhance muscle mass, increase strength, and improve endurance.

STRENGTH
100 mg/ml

DOSAGE
200mg - 600mg/week

PACKAGING
10ml Vial

TABLETS
TABLETS
TABLETS
TABLETS
TABLETS

ANADROL

Oxymetholone

DESCRIPTION

Oxymetholone is a derivative of dihydrotestosterone, which gives it a chemical structure that does not aromatize. Despite the fact that oxymetholone does not directly convert to estradiol, it itself has pronounced estrogenic properties.

STRENGTH

50mg/Tablet

DOSAGE

50-100 mg per day

PACKAGING

100 Tablets

ANAVAR 10

Oxandrolone

DESCRIPTION

Oxandrolone (also known as anavar) is an oral 17-alpha-alkylated steroid, modification of dihydrotestosterone. Oxandrolone possesses many functions that are beneficial but it is in its ability to reduce Sex Hormone Binding Globulin (SHBG).

STRENGTH

10mg/ Tablet

DOSAGE

30 - 50 mg per day

PACKAGING

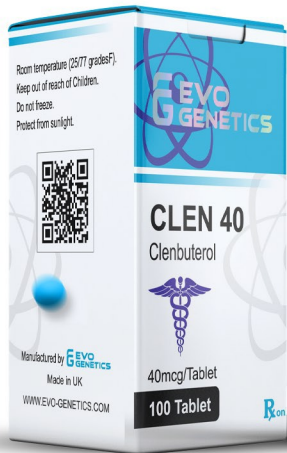

100 Tablets

CLEN 40

Clenbuterol

DESCRIPTION

Very effective fat loss stimulant with anti-catabolic properties.

STRENGTH

40 mcg/Tablet

DOSAGE

40mcg - 80mcg/day

PACKAGING

100 Tablets

DANABOL 10

Methandienone

DESCRIPTION

Quick strength and weight gain. Great pump. One of the most popular steroids in the world.

STRENGTH

10mg/ Tablet

DOSAGE

30mg - 60mg/day

PACKAGING

100 Tablets

STANA 10

Stanozolol

DESCRIPTION

Promotes a hard and dry look. Increases vascularity, strength and pump. Great for competition.

STRENGTH

10mg/ Tablet

DOSAGE

30mg - 60mg/day

PACKAGING

100 Tablets

T3 50

Liothyronine Sodium

DESCRIPTION

Promotes extreme fat loss & highly stimulates thermogenesis.
Enhance energy levels.

STRENGTH

50 mcg/Tablet

DOSAGE

25mcg - 100mcg/day

PACKAGING

50 Tablets

PEPTIDES
PEPTIDES
PEPTIDES
PEPTIDES
PEPTIDES

DESCRIPTION

As a bodybuilding drug, HGH supplements increase lean body mass, shortens recovery time between workouts, and enhances overall performance with less risk of detection than other performance-enhancing drugs. HGH strengthens joints and ligaments and heals damaged tissue.

Other bodybuilding benefits of human growth hormone include increased protein synthesis abilities, an increase in the amount of insulin a person can use effectively, and an increase in the amount of anabolic steroids a person can use effectively

EVOTROPIN

Somatropin

STRENGTH

12 i.u./vial

DOSAGE

4 iu - 6 iu/day.

PACKAGING

5 vials of 12 IU of Somatropin 191aa

EVOIGF

INSULIN GROWTH FACTOR-1 LR3

DESCRIPTION

Stimulate Muscle growth locally. Regenerates nerve tissue. Helps burn fat, increase protein transport into cells & reduce protein breakdown, decreases LDL cholesterol.

STRENGTH

100 mcg/vial

DOSAGE

40 mcg - 100 mcg/day.

PACKAGING

5 vials of 100 MCG of IGF-1 LR3

EVOFRAG

HGH Frag 176-191

DESCRIPTION

HGH Frag 176-191 is a modified form of amino acids 176-191 of the GH polypeptide. It increases appetite suppressant effect of many over the counter fat burners.

STRENGTH
2mg/vial

DOSAGE
200 mcg - 400 mcg
two times daily.

PACKAGING
5 vials of 2MG of HGH-FRAG 176-191

EVORP6

GROWTH HORMONE RELEASING PEPTIDE-6

DESCRIPTION

RP6 increases the natural production of human growth hormone in the body and thus have the same positive effects as synthetic human growth hormone such as fat loss, extremely increase appetite, better sleep and recovery.

STRENGTH

5mg/vial

DOSAGE

200 mcg - 400 mcg
two times daily.

PACKAGING

5 vials of 5MG of GHRP-6

DESCRIPTION

Semaglutide is a GLP-1 (glucagon-like peptide-1) analogue, commonly used to manage type 2 diabetes and obesity. It mimics the action of GLP-1, a hormone that regulates blood sugar levels by enhancing insulin secretion and reducing glucagon release after meals. Semaglutide also slows gastric emptying and suppresses appetite, helping with weight management. Available in injectable or oral forms, it has shown significant efficacy in controlling blood sugar and promoting weight loss when combined with diet and exercise.

SEMAGLUTIDE

GLP - 1 ANALOGUE

STRENGTH

1 mg/vial

DOSAGE

0.25 mg under the skin
once a week for 4 weeks

PACKAGING

5 Vials X 1 MG of GLP-1 ANALOGUE

DESCRIPTION

EVO-CJC is a formulation containing GHRP-2 (Growth Hormone Releasing Peptide 2), designed to stimulate the natural release of growth hormone in the body. GHRP-2 acts on the pituitary gland, boosting growth hormone secretion, which supports muscle growth, fat loss, and enhanced recovery. It is commonly used to promote overall physical performance, improve energy levels, and aid in tissue repair. Ideal for athletes or individuals seeking growth hormone benefits, EVO-CJC helps in optimizing muscle development and faster recovery from injuries.

EVO-CJC

GROWTH HORMONE-RELEASING HORMONE

STRENGTH

2 mg/vial

DOSAGE

200 mcg - 400 mcg
two times daily.

PACKAGING

5 Vials X 2 MG of GHRP-2

DESCRIPTION

EVORP2 (GHRP-2) is a synthetic peptide that stimulates the secretion of growth hormone by binding to specific receptors in the pituitary gland. It enhances the natural release of growth hormone, which can support muscle growth, fat loss, and recovery. This peptide is often used in medical and athletic settings for its ability to improve physical performance, aid in muscle development, and promote tissue repair.

EVORP2

GROWTH HORMONE RELEASING PEPTIDE-2

STRENGTH

5 mg/vial

DOSAGE

200 mcg - 400 mcg
two times daily.

PACKAGING

5 Vials X 5 MG of GHRP-2

EVOJOINT

BPC157 & TB500

DESCRIPTION

EVOJOINT is a powerful combination of BPC-157 and TB500, peptides known for their healing and recovery properties. BPC-157 (Body Protection Compound) promotes tissue repair, speeds up wound healing, reduces inflammation, and supports gut health. TB500 (Thymosin Beta-4) enhances muscle recovery, reduces scar tissue formation, and improves flexibility.

STRENGTH
100 mg/vial

DOSAGE
20 mcg - 40 mcg daily.

PACKAGING
5 Vials X 10 MG of BPC157 & TB500
